

FORMA · AI AGENCY

WE BUILD AI YOU ACTUALLY OWN.

Not another subscription. An AI agent that runs on your own servers, with code you keep. Here's who we are — in 9 honest slides.

AGENCYFORMA.COM

WHY WE STARTED

MOST COMPANIES RENT THEIR AI.

You pay per message through someone else's API. Your data leaves the building, the bill grows with every call, and the day they change pricing or policy — your workflow breaks. You built on rented land.

IN PLAIN LANGUAGE

TWO THINGS, DONE WELL.

AI AGENT CHAINS

Software that does a whole task end to end — it searches, reads, drafts and delivers, like a tireless assistant working a repeatable job for you 24/7.

RAG — YOUR PRIVATE KNOWLEDGE

It answers from your documents, not the public internet. Contracts, manuals, past deals — so the answers are yours and grounded, not guessed.

NO LOCK-IN

IT RUNS ON YOUR SERVERS.

- You keep the source code. We hand it over — nothing is held hostage.
- Your data never leaves. It stays on infrastructure you control.
- No per-seat tax. Add the whole team without the bill exploding.

MAP → BUILD → STAY

WE DON'T HAND OFF AND **VANISH.**

01 We map where it pays

A free working session on the process eating your team's time. You leave with a written map — yours to keep, even if we never work together.

02 We build it on your servers

In 14 days one working agent goes live inside your own systems — real work, not a demo. **The code is yours from day one.**

03 We stay until it sticks

The hard part isn't launch — it's getting used. We stay through rollout. **Not paid back in 60 days? Full refund.**

WE DON'T AI EVERYTHING

GOOD FITS FOR AN AGENT.

- Reading piles of documents and pulling out what matters.
- Drafting the first version — replies, summaries, reports — for a human to approve.
- Answering "where is it / what did we agree" from your own files in seconds.
- If a spreadsheet or a simple rule solves it — we'll tell you, and not sell you an agent.

WHAT WE WON'T PROMISE

WHAT WE WON'T DO.

We won't say AI replaces your team

It removes the boring repetition so your people do the work that needs judgement.

We won't hide the costs

Build, hosting and running costs are on the table up front — no surprise invoices.

We won't ship a black box

You get code you can read and maintain. Refundable if it doesn't pay back in 60 days.

NO MIDDLE LAYER

YOU TALK TO THE BUILDERS.

- A small, senior team — the people scoping your project are the ones writing the code.
- No account managers, no hand-offs. Direct line from idea to shipped agent.
- We use these tools on ourselves first before we ever put them in front of you.

SAVE THIS SLIDE

THE WHOLE THING, IN ONE LOOK.

- | | | |
|----|------------------------|------------------|
| 01 | What we build | AI agents + RAG |
| 02 | Where it runs | Your servers |
| 03 | Who owns the code | You do |
| 04 | First agent live in | 14 days |
| 05 | If it doesn't pay back | Refundable · 60d |
| 06 | Who you talk to | The builders |

WHEN RENTING AI STOPS ADDING UP

WANT ONE THAT'S **YOURS?**

Book a 30-min discovery call. We'll scope a 14-day pilot for one workflow — no pressure, no jargon.
